Full-stack developer with hands-on experience in **Python, JavaScript, TypeScript, React, Next.js, FastAPI**, and **AI development**. Collaborative and independent problem-solver with a strong ability to learn and apply new technologies. Passionate about web development with a particular interest in integrating AI, looking for an opportunity to contribute my skills to a challenging and collaborative development environment.

PROFESSIONAL EXPERIENCE

Full-Stack Developer – 2026-present

- Built full-stack web applications using React, Next.js, TypeScript, Python, and FastAPI.
- Developed AI-powered applications using OpenAI API, LangChain, RAG, and LLMs.
- Designed and implemented REST APIs with FastAPI and PostgreSQL for scalable backend systems.
- Worked with AI-powered semantic search and vector databases to build intelligent applications.

PROJECTS

News Web Application – Personal Project

A responsive web application that allows users to browse and explore the latest news through a clean and user-friendly interface.

- Developed a responsive news platform using modern web development technologies.
- Integrated a news API to fetch and display real-time news articles from different categories.
- Implemented category-based news browsing and dynamic content rendering.
- Designed a user-friendly interface for a smooth news reading experience.

Weather Web Application – Personal Project

A weather application that provides users with current weather information based on their selected location.

- Developed a responsive weather application with a simple and intuitive user interface.
- Integrated a weather API to retrieve real-time weather data.
- Implemented location-based weather search and dynamic weather information display.
- Built the application with a focus on responsive design and user experience.

EDUCATION

B.S. in Computer Science | COMSATS University

Studied core subjects including Data Structures, Algorithms, Database Systems, Software Engineering, Web Development, and Programming.
